VICROUND

SUSTAINABLE COLLECTION

ACOUSTIC ART PANEL

Sustainable acoustic material with various printing, making your space stylish and quiet.

Have you ever wondered a cool printing can also be an acoustic treatment for your home studio to reduce the sound?

The Art Panel of VICROUND ACOUSTIC COLLECTION can make this happen!

SUSTAINABLE & SOUND-ABSORPTION MATERIAL

The Acoustic Art Panel is made from GRS(Global Recycle Standard) certificated rPET, which is made from recycled PET and recyclable. The porous structure of rPET shows great sound-absorption performance, and it is the greenest alternative to traditional sponge plastic. To help you reduce noise when working from home, this art panel creates a hybrid-work space where you can focus, and improve your sound with style.

SUSTAINABLE FIBER

Plastic Bottle → Shredded into Flakes → Turn into Recycled Polyester Chips → Make Yarn → Acoustic Products

WE ONLY HAVE ONE EARTH!

VICROUND is committed to complying with legal standards, reducing operational risks, developing new competitive advantages in technology, management, and operations, working closely with partners and suppliers, developing green products to reduce environmental impacts, realizing green corporate social responsibility, and working together to create a more sustainable world.
