VicRound Limited Company

A Smart and Reliable Solution

VicRound Limited Company was founded in 1991. We provide ODM/OEM solutions for clients across multiple industries. Our passionate team members are experts in product development, project management, marketing, and quality assurance with backgrounds ranging from gaming to peripheral industries.

VicRound aims to develop the latest peripherals. With rich experience in the application of fabric, foaming, optical film, and recycled materials like rPET. VicRound has always been committed to fulfilling customers' needs and creating profitable product plans.

We not only aim to balance workable solutions between material limitations and market demands to bring success to our clients but also view green corporate social responsibility as our top priority to create a more sustainable world.

Acoustic Products Are For...

More Comfort

A good acoustic product can comfort your ears and head. Noise can cause certain activities to eat away at your peace and quiet. A good sound environment can increase productivity and make people feel stable, focused and relaxed.

Increase Privacy

The main function of many acoustic panels is to absorb sound. Installing acoustic panels on your walls and ceiling can lead to increased privacy, and prevent your conversation from carrying too far away.

Better Entertainment

A suitable acoustic product can break up and redirect sound, helping a space sound natural while keeping sounds clearer and better overall. You can have cinema quality sound experience at home or work place without big expense.

Acoustic Chamber

300*300*35mm

6pcs / set

Sustainable Material

It is made from recycled plastic bottles, which can also be fully recycled.

Maximum Absorption

3D structure absorbs excessive noise and ensures that the sound waves don't reflect back.

Decorative

It is easy to install on the wall with as many layouts as you like.

Acoustic Movable Screen

775*500*35mm / D=12mm

1pcs / set

Sustainable Material

It is made from recycled plastic bottles, which can also be fully recycled.

Instant Privacy

It creates a private and quiet environment to block out unwanted noise and brings more productivity.

Good Performance

Pore fabric provides great noise reduction.

Acoustic Art Panel

300*600*6mm

3pcs / set

Sustainable Material

It is made from recycled plastic bottles, which can also be fully recycled.

Good Performance

Pore fabric provides great noise reduction.

Decorative

You can install it wherever you like.

Customized Printing

With your beloved artworks printing.

Acoustic Wall Puzzle

241*100*33mm

6pcs / set

Sustainable Material

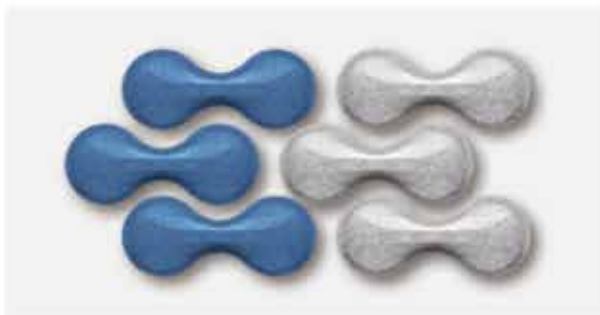

It is made from recycled plastic bottles, which can also be fully recycled.

Maximum Absorption

3D structure absorbs excessive noise and ensures that the sound waves don't reflect back.

Decorative

It is easy to install with as many layouts as you like.

Acoustic Ceiling Panel

600*600*35mm

4pcs / set

Sustainable Material

It is made from recycled plastic bottles, which can also be fully recycled.

Decorative

It is easy to install on the ceiling.

Saving Space

It saves that much-valued wall space and has strong visual impact.

About Sustainability

Eco-friendly consciousness is seeping into every crack of modern life.

Going green is no longer a fringe activity for brands.

We see more and more global brands making the significant changes necessary to be more sustainable and to work toward green.

rPET Felt Product's Low Carbon Footprints

All the felt products in VicRound Acoustic Collection are made with GRS certificated rPET.

You might think plastic is not a typical sustainable material, but considering the manufacturing process, carbon emissions and recyclability, rPET felt products do a really good job in sustainability.

E for Ergonomic

Improve Your Workspace Ergonomics

Stand

Wrist Rest

A complete solution keeps you focusing on work, not office supplies.

Ergonomic

Foldable

Functional

Light Weight

Why Do You Need an Ergonomic Solution?

It keeps high productivity.

Ergonomics not only improves comfort but also productivity. Hybrid work tends to work in a variety of environments - living room sofa, coffee shop bar, standing work or working on the go.

This ergonomic solution is designed to make it easier for you to adapt to diverse work environments, providing ergonomic comfort at all times to further ensure work output.

Saves You From Stress

It improves your workspace ergonomics which in turn helps with posture and relieves back pain, neck pain, and saves you from further stress issues.

Easy to Carry

Most of the ergonomic devices in the market are super big and heavy as they are made of metal. However, the devices in our ergonomic solution is easy-carried wherever you go.
